IE 535 - Human Computer Interaction

Fall 2017

Graduate Research Paper Requirements

The graduate research paper, required for all students registered for IE 535, is due on 12/13/2017 by 3:30 PM.

This research paper should provide a thorough review of some area of human-computer interaction, citing relevant literature in the field. It is expected that between 10 and 20 references are cited with sources drawn primarily from published journals and conferences, rather than textbooks or the web. Please not that these requirements do not preclude the use of journal articles and conference papers found on the web, rather it just eliminates the use of web-only content.

Research papers should be 10-15 pages in length and double spaced. Papers should include a reference list at the end and should be organized and formatted to follow APA or IEEE requirements.
